Dear Dan,

During my searching I have unearthed a useful photograph and enclose a professional copy.

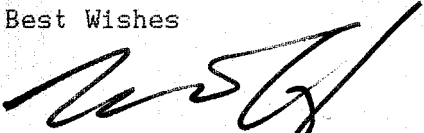

This was in the Pacific Club File but I believe that it was taken in Georgia or Alabama. It shows the 68 Le Mans Sprite. I think that a diagonal brace has been added to the roll cage. It is outside someones garage and the street/house number is discernable as " 333 "

This is the car as it was after a short time in the USA and seems to confirm that Jim Baker had it. This could give you something to follow up. The decals are identical with other photos.

It looks as though the pop rivetts have been drilled out and the rear plexiglass removed and some paint has been removed (burnt by welding) near the top rear edge. These photos could help with your restoration work. These photos a positive proof of the car being at some place after leaving our hands which ~~msakes me more sure~~ that your car is the 68 car.

Msargot and I will be at the West Coast Meet in Washington in August.

Best Wishes

Geoff Healey
